Education

- Currently pursuing **Bachelor of Technology** at Invertis University (2022-2026), with a current CGPA of **7.5**.
- Completed **Class 12th (UP Board)** in 2022 with a score of **63.8%**.
- Completed **Class 10th (UP Board)** in 2020 with a score of **79.5%**

Skills

- **Programming:** JavaScript, HTML, CSS, React.js, GSAP, Node.js, Express.js, MongoDB, Tailwind and Bootstrap
- **Tools & IDEs:** Git, GitHub, Visual Studio Code

Projects

Doctor Appointment Booking System

Dec 2024 – Feb 2025

Collage Project

React.js, Node.js, Express.js, MongoDB, MERN stack

- Designed and developed a full-stack Doctor Appointment Booking System using the MERN Stack.
- Built a responsive and user-friendly frontend using React.js, enabling patients to browse doctors, check availability, and book appointments easily.
- Implemented appointment scheduling functionality, allowing users to select time slots and manage bookings efficiently.
- Integrated Stripe payment gateway to support secure online payments for appointments.
- Developed backend RESTful APIs using Node.js and Express.js for handling users, appointments, doctors, and payment data.
- Designed and managed MongoDB schemas to store patient details, doctor profiles, appointment records, and transaction history.
- Implemented authentication and authorization to ensure secure access for patients and doctors.
- Enabled doctor availability management, allowing doctors to update available time slots and view scheduled appointments.
- Ensured data validation, error handling, and API security for reliable system performance.

Yatra App – Ride Booking Platform (Ongoing)

Nov - 2025

Team Project | MERN Stack

- Currently developing a full-stack ride booking and transportation platform using the MERN Stack, focusing on scalability, security, and smooth user experience throughout the booking lifecycle.
- Collaborating closely with a team to plan application architecture, divide responsibilities, and implement scalable frontend and backend features, following best practices in full-stack development.
- Working on the React.js frontend to create responsive and user-friendly interfaces.
- Contributing to REST API development using Node.js and Express.js.
- Designing and managing MongoDB schemas for users, drivers, and ride data.
- Implementing authentication and authorization using JWT.
- Developing core features such as user registration, ride booking flow, and role-based access.
- Using Git and GitHub for version control and team collaboration.
- Actively enhancing the app with advanced features such as real-time ride updates and fare calculation.

Leadership & Awards

Team Lead – Doctor Appointment Booking System

- Lead a team in designing and developing a full-stack Doctor Appointment Booking System using the MERN Stack.
- Managed task allocation, project planning, and coordination across frontend and backend development.
- Guided team members on technical implementation, conducted code reviews, and resolved development issues.
- Ensured timely delivery with a focus on clean architecture, security, and user experience.

Team Lead – Yatra App (Ride Booking Platform)

- Leading a team in the design and development of a full-stack ride booking platform, ensuring scalable and secure architecture.
- Planning project structure, assigning tasks, and coordinating frontend and backend development among team members.
- Guiding the team on React.js, REST API development, and database design, while reviewing code and resolving technical issues.
- Managing progress, collaboration, and version control using Git and GitHub to keep development on track.

Certifications

- **Web Development Using HTML** – Etrain Education
- **HTML, CSS, JavaScript : Building the web** – LinkedIn Learning
- **IEEE XPLORE** – IEEE
- **POWER BI WORKSHOP** – Ducat India
